EXPERIENCE

Open Source Market Labs – Present
March 2020– Present
A Local business where developers work on personal projects helping developers gain knowledge and experience. From learning how to work on a team and meet project deadlines. In the short time, I have been at Open Source Market Labs I have worked with Gatsby and a variety of different technologies.

Zero TO Mastery –ZTM Open Source Project
February 2021- Present
Students are encouraged to contribute to Zero To Mastery open-source Github. The projects are meant to be practiced and you are allowed to make your contribution to the repositories. It's meant to simulate a real-world environment as a way to gain experience, collaborate with your code and learn the Github environment.

EDUCATION

Zero To Mastery Academy, — *Certificate*

April 2020 - Present

Udemy is an online course boot camp where students are taught from the basics of web development to advanced topics. You go at your own pace given challenges to test your knowledge. Students are encouraged to help each other out in discord by reviewing code and asking for help you learn how to collaborate with others.

Free Code Camp– Certificate

February 2020 - Present

An online platform for students to learn web development and do multiple projects from scratch from highly proficient instructors that have been developers in the field and have built high-quality courses. You learn mobile responsive and visual design technologies. Currently, I am using HTML5, CSS3, S CSS, ES6, React.
